EDUCATION

University of Washington - Seattle

Seattle, WA

Intended Major: Computer Science

Sep. 2025 – June 2029

Relevant Coursework: Intermediate Data Programming

South Puget Sound Community College

Olympia, WA

Associate's in Computer Science

Sep. 2023 – June 2025

Relevant Coursework: SQL Fundamentals, Object Oriented Programming, Calculus

EXPERIENCE

Olympia Robotics Federation - FRC TEAM 4450

Olympia, WA

Team Captain

June 2024 – June 2025

- Restructured team leadership, forming a necessary chain of command ensuring success of the team.
- Led hands-on training workshops for each mechanical subsystem of the robot, guiding rookies through the fundamentals of design, programming, and assembly.
- Organized meetings and overnight travel plans for team competitions for 35+ high school members.

Control Systems Programmer

June 2024 – August 2025

- Lead programmer for the USS Leviathan robot for the FIRST Robotics Reefscape season (see Project).
- Worked closely with other sub-teams to develop code for our robot design, supporting motor control and pneumatic systems bringing a high level of sophistication and code efficiency for the 2025 FRC season.
- Worked with match strategy leads to program an autonomous routine that is run during the first 15 seconds of the match.

Lead Electrical Engineer

May 2023 – June 2024

- Designed and implemented wiring schematics for drivetrain and subsystems, ensuring reliable power distribution while overseeing all electrical engineering aspects of the 2024 season robot *USS ProtoStar*.
- Installed and configured motor controllers to support precise control of robot mechanisms while collaborating with mechanical and programming teams to integrate electrical systems with drivetrain and subsystems.
- Ensured safety, organization, and maintainability of electrical components throughout build and competition.

Chief Communications Officer

May 2023 – June 2024

- Managed official team paperwork, documentation, and administrative tasks to support smooth operations.
- Strengthened communication channels between students, parents, and mentors to improve team coordination.
- Coordinated travel logistics and competition plans, ensuring efficient scheduling and team organization.

Headstarter AI

Remote

Software Engineer Fellow

July 2024 – September 2024

- Learned the basics of HTML, CSS, and JavaScript to develop a personal portfolio website.
- Learned how to deploy frontend and backend services through Vercel and Render.

PROJECTS

USS Leviathan Control System | *Java*

Jan 2025 – August 2025

- Developed sophisticated data logging, computer vision systems, 3D field positioning systems, and precise mechanical control theory for the roboRIO platform.
- Worked closely with key team members to utilize hardware and controllers effectively and strategically
- Addressed and mitigated mechanical, electrical, and code issues under an intense timeline.

Employee Management System | *SQL*

Feb 2025 - March 2025

- Developed a database for any organization's employee records. Included tables for employees, departments, and job roles
- Wrote queries to find the highest-paid employees, average salaries by department, and employee hierarchy. Used subqueries to identify employees with specific qualifications or experience

TECHNICAL SKILLS

Languages: Java, Python, SQL (T-SQL), HTML, JavaScript, CSS

Developer Tools: Git, VS Code, Eclipse, IntelliJ, AWS, Pandas, NumPy, Matplotlib
