EDUCATION

University of Washington - Seattle

Intended Major: Computer Science

Relevant Coursework: Intro to Database Systems

Seattle, WA

Sep. 2025 – June 2029

South Puget Sound Community College

Associate's in Computer Science

Relevant Coursework: SQL Fundamentals, Object Oriented Programming, Calculus

Olympia, WA

Sep. 2023 – June 2025

EXPERIENCE

Olympia Robotics Federation - FRC TEAM 4450

Team Captain

Olympia, WA

June 2024 - June 2025

- Engineered team workflows by restructuring leadership roles, enabling smoother collaboration across sub-teams.
- Strengthened rookie development by leading hands-on workshops in design, programming, and assembly, resulting in rookies being prepared for build and design a month in advance.
- Coordinated competition travel logistics for 35+ members, optimizing scheduling and communication between students, mentors, and parents.

Control Systems Programmer

June 2024 - August 2025

- Lead programmer for the *USS Leviathan* robot for the FIRST Robotics Reefscape season (see [Project](#)).
- Collaborated with sub-teams to implement code for motors and pneumatic systems, bringing high code efficiency and sophistication while integrating with mechanical and electrical systems to improve overall system stability.
- Developed control software structured as a state machine, enabling efficient coordination of motors, pneumatics, and sensors, maximizing hardware utilization and ensuring reliable autonomous and teleoperated performance.

Lead Electrical Engineer

May 2023 - June 2024

- Designed and wired drivetrain and subsystem schematics, ensuring stable power delivery and operational reliability of the 2024 season robot *USS ProtoStar*.
- Programmed motor controllers to achieve precise mechanical movements, integrating with control software.
- Standardized electrical systems to improve maintainability and reduce potential failures during competitions.

Headstarter AI

Remote

Software Engineer Fellow

July 2024 - September 2024

- Engineered a personal portfolio website using HTML, CSS, and JavaScript to demonstrate projects and technical capabilities.
- Deployed applications on Vercel and Render, gaining hands-on experience with full-stack deployment workflows.
- Applied version control and collaboration through GitHub workflows, including branching, merging, and reviewing.

PROJECTS

USS Leviathan Control System | Java

Jan 2025 – August 2025

- Implemented computer vision, control systems, and data logging enhancing robot performance and adaptability.
- Improved 3D robot positioning using visual-inertial odometry with an Oculus headset during the post-season.
- Debugged and integrated software, electrical, and mechanical systems to ensure competition readiness.

Employee Management System | SQL

Feb 2025 - March 2025

- Designed a relational database for employee, department, and role data, improving record organization.
- Created SQL queries to analyze salaries, department averages, and reporting hierarchies, including subqueries for employee qualifications.
- Automated queries and documentation to streamline HR data retrieval.

TECHNICAL SKILLS

Languages: Java, Python, SQL (T-SQL), HTML, JavaScript, CSS

Developer Tools: Git, VS Code, Eclipse, IntelliJ, AWS, Pandas, NumPy, SQLite. Amazon EC2
